SUMMARY

Computer Science graduate (Software and Application Development) with a strong focus on back-end development. Hands-on experience with Python, Django, FastAPI, and database design. Passionate about building efficient, scalable back-end systems and proven leadership through heading the backend track at Google Developer Groups.

EXPERIENCE

Google Developer Group (GDG) – Benha National University Oct. 2024 – Present
Head of Backend Team Benha, Egypt

- Promoted to **Head of Backend Team in 2026**, overseeing backend curriculum and team direction
- Served as **Technical Member of the Backend Team in 2024–2025**, delivering hands-on technical sessions and supporting participants with backend concepts and implementation

Faisal Islamic Bank of Egypt Aug. 2025 – Aug. 2025
Banking Operations Trainee Egypt

- Completed a **one-month internship** (Aug. 2025) supporting daily banking operations, communicating with clients and colleagues in a fast-paced, professional environment

Credit Agricole Egypt July 2025 – Aug. 2025
Banking Operations Trainee Egypt

- Completed a **one-month internship** (July 2025) handling customer inquiries and cross-team coordination, gaining exposure to structured financial workflows

PROJECTS

Kalamna – AI Customer Support Platform (*Graduation Project*) 2025 – 2026

- Designed a **multi-tenant backend architecture** in FastAPI with business-level data isolation and **role-based access control**; built full auth flows (JWT, refresh tokens, password reset, email verification) for owners and staff
- Built a **RAG pipeline** that ingests and chunks business documents, generates embeddings, and stores them in **PostgreSQL with pgvector** for semantic search and context retrieval
- Integrated **streaming AI chat** via Gemini with dynamic prompt construction based on business settings, conversation history, and real-time **emotion/sentiment detection**
- Implemented **Redis caching** with invalidation on document updates, and background workers (async) for document processing, conversation cleanup, and analytics/summary generation, using **SQLAlchemy (async) and Alembic**

Cinema Tickets Reservation API 2024 – 2025

- Built a RESTful Cinema Reservation System using **Django REST Framework**, enabling users to browse movies, select showtimes, and reserve tickets through secure API endpoints
- Implemented **JWT authentication** for secure user registration and login; structured database models to manage movies, showtimes, reservations, and users

Event Booking Web API 2024 – 2025

- Developed a **Django REST Framework** API for an Event Booking System with role-based access; users can browse events, register, and make secure bookings
- Implemented JWT authentication and structured database models to manage events, bookings, and users efficiently

To-Do List Web App 2023 – 2024

- Built a full-stack To-Do List application using **Django** with user authentication, task CRUD operations, and role-based access control; deployed on **Heroku**
- Designed a structured database with Django Models to ensure data privacy and personalized task management for each user

Store Management System Database

2023 – 2024

- Designed a **MySQL relational database** to manage an online store's users, products, categories, shopping cart, orders, and reviews with a scalable e-commerce structure

Portfolio Website

2024

- Built a responsive personal portfolio using **HTML, CSS, and JavaScript**, deployed via GitHub Pages; showcases projects, skills, and technical background

EDUCATION

Benha National University

Aug. 2022 – May 2026

Bachelor of Science in Computer Science, Software and Application Development

Benha, Egypt

- Coursework:** Data Structures & Algorithms, Database Systems, Operating Systems, Object-Oriented Programming, Software Engineering, Computer Networks
- Graduated:** 2026

CERTIFICATES

Introduction to Databases for Back-End Development – Meta

HCIA-Datacom – Huawei

Python Programming Basics – Information Technology Institute (ITI)

SKILLS

Languages : Python (3+ years), JavaScript, Dart, PHP

Frameworks : Django (2+ years), Django REST Framework (2+ years), FastAPI (1+ year)

Databases : MySQL (2+ years), SQLite, PostgreSQL

Tools & Technologies : Git, GitHub, Docker, Redis, RESTful APIs, RAG, HTTP/HTTPS, HTML, CSS
